ABOUT US

In 2014, Geverse entered the construction market with an innovative vision and a commitment to the highest standards of quality. From its inception, the company set a mission to drive development while ensuring the well-being of people and the environment.

Geverse began by constructing residential buildings and soon expanded into the production of large-scale iron structures for billboard advertisements. With its accumulated experience, the company transitioned to larger, more ambitious projects, such as the unprecedented construction of a 5-star hotel complex.

In a short period, Geverse Construction secured a strong position in Georgia's construction and real estate markets.

WHY GEVERSE CONSTRUCTION ?!

At Geverse Construction, we offer an extensive range of services backed by diverse expertise, making us your ideal partner for any project. These factors will make you decide to collaborate with each member of our team.

Our commitment to excellence guarantees that your project will be constructed according to all standards, we will help you optimize costs and time, and we will complete and deliver the project within the promised deadline.

OUR PRIORITY

- Quality - The best materials and technology
- Safety - 100% protection
- Experience - Execution of various types of projects
- Innovation - Construction in accordance with international standards

Geverse Construction is committed to surpassing conventional standards, refusing to settle for anything ordinary or average. We use only high-quality products and innovative methods, taking full advantage of today's local and international markets as well as modern technological advancements.
